

BIOSTIMULANTS

HUMIC PLUS

Advanced Growth & Stress Tolerance Biostimulant (Liquid)

HUMIC PLUS is an advanced biostimulant formulated with humic and fulvic acid along with amino acids, plant growth hormones, and essential enzymes. It promotes vegetative growth, enhances flowering and fruit set, and supports higher yield with improved crop quality. It also helps plants perform better under stress conditions and supports overall plant health.

Product Specifications

Feature	Details
Category	Liquid Biostimulant
Active Ingredient	Humates & Fulvates (22% Total)
Composition	Minimum 22% Total Water Soluble Humates & Fulvates
Pack Size	1 Litre
Compatibility	Compatible with all chemical fertilizers

Key Benefits

- **Vegetative Growth Enhancement:** Promotes plant growth by increasing the number of branches and tillers.
- **Flowering & Fruit Set:** Enhances flowering and fruit setting, leading to better productivity.
- **Stress Tolerance:** Supports plants under stress conditions and improves overall plant health.
- **Nutrient Efficiency:** Improves nutrient uptake and utilization for better crop performance.
- **Growth Stimulation:** Contains amino acids, gibberellins, cytokinins, and enzymes that stimulate plant growth.
- **Yield & Quality Improvement:** Ensures higher yield with improved quality and better economic returns.

Application Guide

Recommended Stage: Apply during active vegetative growth stages, prior to flowering, or when plants are experiencing stress conditions to maximize recovery and overall performance.

Crop Type	Application Method	Dosage
Field Crops	Soil / Foliar Application	500 ml – 1 Litre per acre
Perennial Crops	Soil Application (near root zone)	1–2 Litres per acre
