

# BIOSTIMULANTS

## EXTRA POWER

### Granular Seaweed-Based Soil Biostimulant

EXTRA POWER is a soil-applied granular biostimulant derived from *Sargassum tenerrimum*, enriched with natural bioactive compounds including phytohormones, antioxidants, and enzymes. It gradually releases active compounds in the soil, enhancing plant growth, improving nutrient uptake, and strengthening crop tolerance to environmental stress resulting in sustainable productivity and improved soil health.

### Product Specifications

Feature	Details
Category	Granular Biostimulant
Active Ingredient	Composition 2% Seaweed Extract ( <i>Sargassum tenerrimum</i> ).
Composition	Rich in natural phytohormones (auxins, cytokinins), antioxidants, enzymes, and organic bioactive compounds.
Pack Size	250 gram, 500 gram, and 1 kg
Compatibility	Compatible with most fertilizers and agrochemicals

### Key Benefits

- **Growth Promotion:** Stimulates root growth and overall plant metabolism through a slow and sustained release of natural bioactive compounds.
- **Enhanced Nutrient Uptake:** Improves nutrient solubilization in the soil, enhancing the availability and absorption of essential nutrients.
- **Stress Tolerance:** Enhances resistance to drought, salinity, and environmental stress using antioxidants to increase plant resilience.
- **Soil Health Improvement:** Enhances soil structure, boosts microbial activity in the root zone, and improves long-term fertility.
- **Biostimulant Activity:** Supports robust plant metabolism and cellular health through a rich blend of essential enzymes.
- **Yield Improvement:** Boosts crop productivity and ensures better quality produce. The easy-to-apply granular formula provides uniform distribution and is suitable for all crops and soil types.

### Application Guide

**Recommended Stage:** Apply during early growth stages or when plants are experiencing stress conditions.

Crop Type	Application Method	Dosage
Field Crops	Soil Application	1 kg per acre
Perennial Crops	Soil Application	2.5 kg per acre
