

# BIOSTIMULANTS

## MAGIC POWER

### Premium Soil Fertility & Root Growth Biostimulant (Powder)

MAGIC POWER is a high-quality biostimulant formulated with humic acid and fulvic acid derivatives. It improves soil fertility, enhances nutrient availability, and promotes better root growth. It supports plant development, stimulates microbial activity, and improves soil health parameters, leading to increased crop yield, better quality, and cost-effective farming.

### Product Specifications

Feature	Details
Category	Biostimulant (Powder)
Active Ingredient	Potassium Humate (49%)
Composition	Minimum 21% Humic Acid
Pack Size	10 Kg
Compatibility	Compatible with all chemical fertilizers

### Key Benefits

- **Soil Fertility Improvement:** Enhances soil fertility and improves germination by creating a favorable soil environment.
- **Root Development:** Promotes strong root growth, improving the uptake of water and essential nutrients.
- **Nutrient Efficiency:** Increases nutrient availability and absorption, supporting better plant growth.
- **Soil Health Enhancement:** Improves soil properties such as pH balance, organic carbon, and water holding capacity.
- **Microbial Activity:** Stimulates beneficial soil microorganisms, enhancing overall soil productivity.
- **Yield & Quality Improvement:** Supports higher crop yield with improved quality and better economic returns.

### Application Guide

**Recommended Stage:** Apply directly to the soil during land preparation or early growth stages to establish a strong foundation for crop development.

Crop Type	Application Method	Dosage
Field Crops	Soil Application	10 Kg per acre
Perennial Crops	Soil Application	20–30 Kg per acre
